Enhanced CFSP Management

Customs Freight Simplified Procedures (CFSP) can provide faster and more reliable release of import cargo at the frontier with a supplementary declaration completed later.
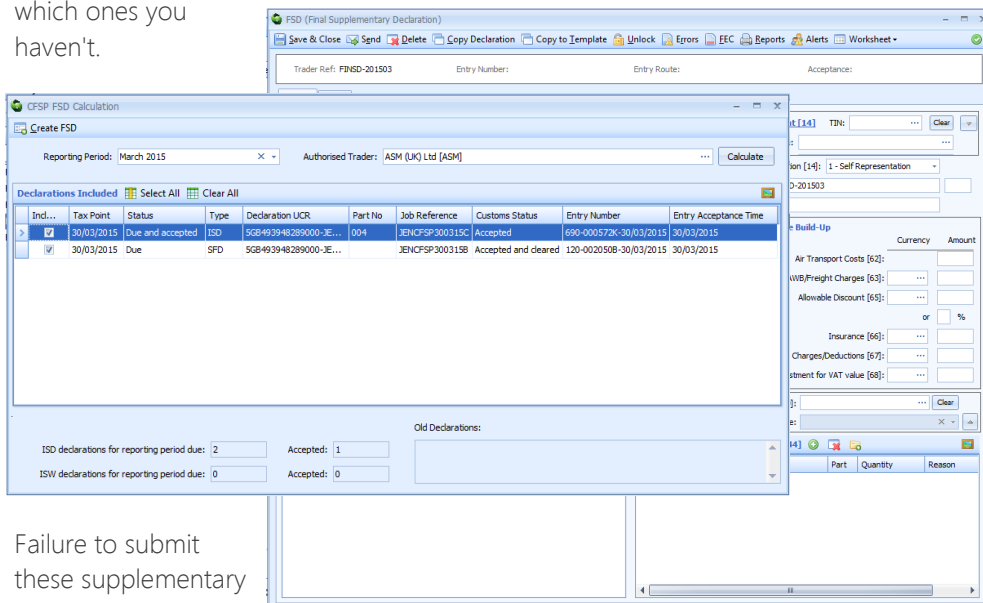

Sequoia lets you complete declarations under CFSP but monitoring and tracking these declarations and reporting the monthly figures to customs can be a time consuming business in itself.

Luckily the Sequoia enhanced CFSP management module does all the hard work for you.

Not only are supplementary declarations auto-completed with the necessary data from the frontier declaration but Sequoia keeps track of which ones you've done and, equally as importantly, which ones you haven't.

automatically and the results and any out-standing issues or missing declarations displayed.

Once you're satisfied that everything is as it should be, another click and the final supplementary declaration (FSD) is completed for you with all the necessary information. All you do then is send it to

Failure to submit these supplementary declarations in the required timescales can lead to major compliance issues that could threaten your CFSP authorisation!

When it comes to month end, a single click and the counts of declarations due and accepted are calculated for you

customs. If something isn't right you can make any necessary adjustments before creating the FSD.

Sequoia CFSP monitors any number of authorised traders simultaneously, whether or not you complete the original frontier or supplementary declarations

Features at a glance

- Role based access and security
- Intelligent, real-time compliance monitoring
- Enhanced productivity
  - ↗ Elimination of dual keying
  - ↗ Reduced errors
- Advanced reporting
  - ↗ Instant report building
  - ↗ Output to html, pdf, rtf, txt, xls
  - ↗ SQL reporting services
- Customisable data views
- Advanced customer database management
- Enhanced data entry features
- Comprehensive search functionality
- Modern technology
  - ↗ Microsoft SQL Server
  - ↗ Microsoft .NET framework
  - ↗ Microsoft Windows with WCF, WWF technology
- Modular plug-in architecture
- Open, extensible platform
- High performance service architecture
  - ↗ Secure service communications
  - ↗ Support for virtualised environments
  - ↗ Support for terminal services
- Extensive interfaces
  - ↗ Industry standard connection protocols
  - ↗ Easily consumable message schemas
  - ↗ Seamless integration with external systems
- Fully customisable print control
- Unrivalled 24x7x365 support
- Comprehensive training
