

Sending FHL Messages in GeMS

ASM GeMS includes the facility to send FHL Messages (electronic HAWB information) through CCS-UK to subscribed carriers. A full list of carriers configured to receive these is at the end of this document. This service requires agents to register with CCS-UK. If you have not done so or require further information please email nina.hollier@bt.com

To enable this messaging within GeMS you must first ensure that you have configured your GeMS software for the relevant carrier. To do this click Standing Data > Data Maintenance. Click on the [+] to the left of carriers to expand the list. Select the relevant carrier, click the edit button then put the bullet point next to "Send FHL" and click Save.

The screenshot shows the 'Data Maintenance' window with the 'Carriers' tab selected. A list of carriers is on the left, and the configuration for 'AIR CANADA' is shown on the right. The 'Send FHL' option is selected and circled in red.

Carrier Code	AC		
Carrier Name	AIR CANADA	Carrier Prefix	014
Address Line	POSTAL STATION SAINT LAURENT PO BOX		
Town	14000 MONTREAL	State/Country	QUEBEC
Post Code	HAY 1H4	Country Code	CA Canada
Contact Number		ICAO Carrier Code	ACA
Insignia			
	<input type="radio"/> CCS-UK CCS (AMS) Service	Import	Clear
	<input checked="" type="radio"/> Send FHL		
	<input type="radio"/> None		
	<input type="checkbox"/> Send FWB		
Supplier			

Once the Airline has been configured, any back to back or hawb export consignment for that carrier will give you the option to send an FHL, regardless of destination. This can be ticked or unticked as appropriate. If ticked, an FHL message will be sent when the Finalise and Print ADS Process has been completed.

The screenshot shows the 'Job Maintenance' window with the 'Job Reference' tab selected. The job details for 'ASMFL001' are shown, including shipper and consignee information, carrier details, and shipment type. The 'FHL' checkbox is checked and circled in red.
