Worksheets

It's four in the afternoon and you finally get your hands on the documents for **the** shipment. It's got a commercial invoice the size of a small novel; page after page of information that needs processing and collating. And you have to get the goods cleared today because your biggest customer has to have it delivered tomorrow morning.

You have to go through the invoice line by line, pencilling in commodity codes and all sorts of other stuff. Then you have to go through it again and again, adding up the values and quantities for each commodity code to sort it into a hand written list of items for the customs declaration. And once you've done all that you've got to decipher your hand written list

hidden cost can all too easily mean the difference between profit and loss.

The irony is that all of the invoice data you need is actually available from your customer electronically but you haven't been able to do anything meaningful with it. But now the game has changed!

The worksheet functionality in **Sequoia** uploads commercial invoice data from automatically. All you have to do then is fill in any missing information and press a button.

We'll even sort the data into the right number of declaration items and complete these for you. No re-keying. No mistakes.

And when your customer needs the report, that's just the click of a button away too. A comprehensive spreadsheet that ties the data from the worksheet together with detailed information about the customs declarations that consumed it, including the all-important amount of duty and VAT paid on every single widget.

and key it all into your declaration software without making any mistakes. Talk about pressure!

To add insult to injury your customer also wants lots of information back once the goods have cleared. A report going into minute detail about how much duty he paid on the widgets on line 225. And he wants that for every shipment he imports. So it's not just about the time it takes to clear the goods (although that in itself is substantial) but all the other stuff around it that keeps adding up. One shipment can eat up hours of your valuable time just handling the data that goes with it. And that often overlooked

Line	Order Number	Product Code	Goods Description	Org	Commodity Code	Invoice Number	Quantity	Cur	Unit Price	Total Value
1	140404	5760202-03	SCREW HARDBS	US		AWR-2016676/LEDP	47,000	USD	25.00	1,175.00

16	140404	14021602-3	BRACKET, MAGNETIC, ALLOY STEEL	US			51,000	USD	19.00	969.00
17	140404	69-76554-1	RADIUS LINK, GRES STEEL	US			1,000	USD	19.00	19.00

Features at a glance

- Role based access and security
- Intelligent, real-time compliance monitoring
- Enhanced productivity
 - Elimination of dual keying
 - Reduced errors
- Advanced reporting
 - Instant report building
 - Output to html, pdf, rtf, txt, xls
 - SQL reporting services
- Customisable data views
- Advanced customer database management
- Enhanced data entry features
- Comprehensive search functionality
- Modern technology
 - Microsoft SQL Server
 - Microsoft .NET framework
 - Microsoft Windows with WCF, WWF technology
- Modular plug-in architecture
- Open, extensible platform
- High performance service architecture
 - Secure service communications
 - Support for virtualised environments
 - Support for terminal services
- Extensive interfaces
 - Industry standard connection protocols
 - Easily consumable message schemas
 - Seamless integration with external systems
- Fully customisable print control
- Unrivalled 24x7x365 support
- Comprehensive training
